Communication, Collaboration, Problem-solving, Adaptability, Time management, Attention to detail, Creativity, Teamplayer

Projects

React-Redux-Ecom | [Git](#)

- Developed a feature-rich E-commerce website using React, Redux Toolkit, and Express.js for integrating cart and favorite functionalities for seamless user experience.
- Implemented a responsive UI with Tailwind CSS, ensuring optimal performance across diverse devices and incorporating user feedback for enhanced interactivity.

React-dummy-App | [Git](#)

- Leveraged React.js and Tailwind CSS to architect and style the "React-Dummy" web app, focusing on responsive design and optimal user experience.
- Transformed UI/UX concepts into reality, employing modern frontend technologies to craft a visually engaging and user-friendly interface for the "React-Dummy" application.

React-dummy-real-estate | [Git](#)

- Implemented a mock real estate platform using React.js, tailoring the frontend with a dynamic and responsive design to ensure a seamless user experience.
- Translated UI/UX mockups into functional components, utilizing React.js and integrating Bootstrap to achieve an engaging and mobile-friendly interface for the dummy real estate website.

JS-Image-Editor | [Git](#)

- Architected and developed a cutting-edge, responsive image editing application, JS-Image-editor, utilizing modern web technologies such as HTML5, CSS3, and ECMAScript 6.
- progressive enhancement principles to create an interactive user interface

JS-Word-Scramble | [Git](#)

- Word Scramble is an interactive game where players unscramble letters to form words. Crafted using HTML, CSS, and JavaScript, our project features a responsive and user-friendly design
- providing enjoyable entertainment across devices.

JS-QR-CODE | [Git](#)

- Generate QR codes effortlessly using HTML, CSS, and vanilla JavaScript.
- The GoQR API powers the code creation, while the responsive design ensures it works seamlessly on all devices.
